Description

The study pack is designed to create believable and colorful study environments without compromising on the beloved stuffed toys! The pack contains over 30 categories of assets from tables to calculators. All assets have prefabs, including over 300 in total! Demo scenes are included to help your creative process!

Details

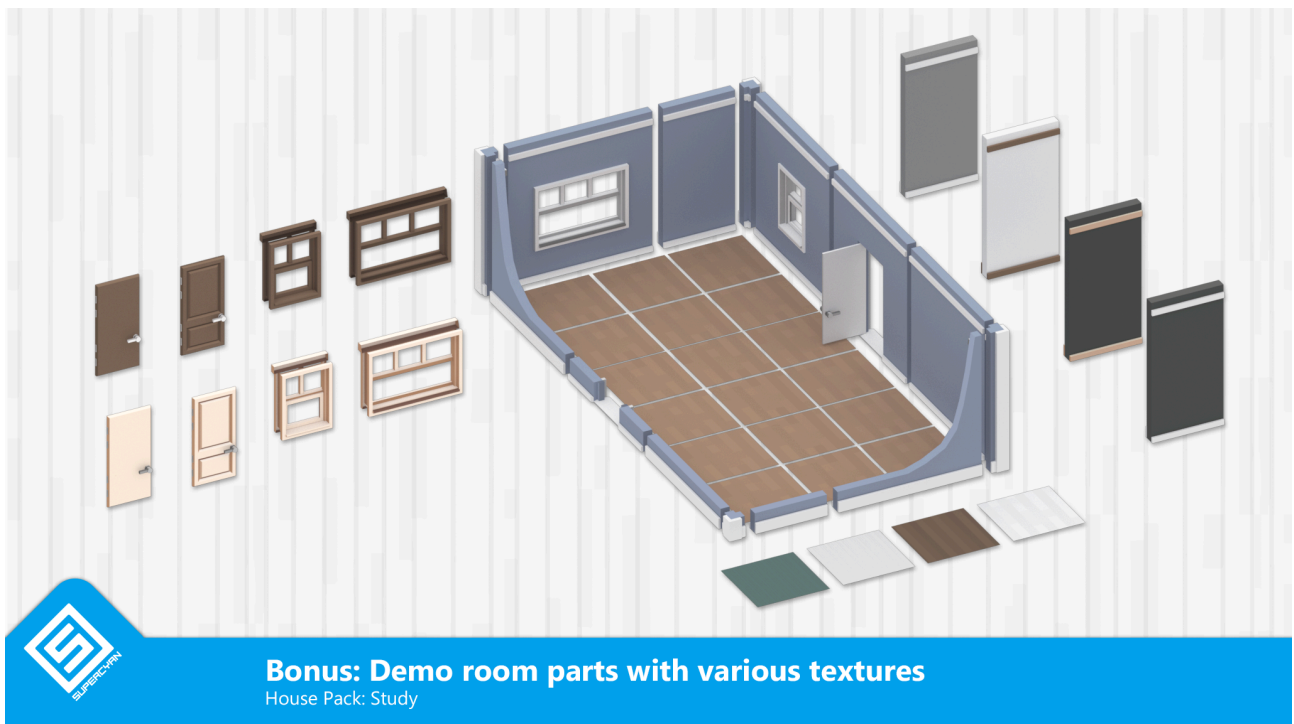

Complete asset listing with texture variants and polycount:

- TV stand (2 textures) (268 tris, 184 verts)
- 7 papers/paper piles (12-788 tris, 8-406 verts)
- 6 magazines/magazine piles (2 textures) (96-328 tris, 188-644 verts)
- 2 notepads (open and closed version) (2 textures) (644-792 tris, 328-398 verts)
- 4 notes on wall (24-180 tris, 26-141 verts)
- 2 calendars on wall (16-48 tris, 16-44 verts)
- 3 water drink bottles (252-316 tris, 135-167 verts)
- 3 juice drink boxes (76-158 tris, 89-96 verts)
- 1 study lamp (3 textures) (1176 tris, 627 verts)
- 3 chairs (776-947 tris, 430-521 verts)
- 1 wall clock (3 textures) (243 tris, 136 verts)
- 1 tabletop clock (3 textures) (1343 tris, 710 verts)
- 2 wall shelves (2 textures) (156-184 tris, 80-96 verts)
- 4 plants (434-3156 tris, 240-1656 verts)
- 7 books (including two open versions) (140-224 tris, 72-146 verts)
- 6 book piles/rows (318-636 tris, 560-1008 verts)
- 10 tables including cubicles and round tables (1-2 textures) (174-608 tris , 112-350 verts)
- 3 beds (764-1378 tris, 447-747 verts)
- 3 calculators (88-1226 tris, 46-633 verts)
- 1 digital box (464 tris, 278 verts)
- 5 disk cases (80 tris, 42 verts)
- 3 pillows (160 tris, 90 verts)
- 1 staff folder (356 tris, 200 verts)
- 5 blankets (88-1226 tris, 46-633 verts)
- 3 wall posters (2-14 tris, 4-16 verts)
- 1 cloth hanging from a clothes rack (3 textures) (2 variations) (176 tris, 90 verts)
- 1 clothes rack (3 textures) (1216 tris, 630 verts)
- 1 laundry rack (3 textures) (1064 tris, 602 verts)

- 1 hanger (3 textures) (215 tris, 118 verts)
- 1 clothespin (3 textures) (68 tris, 38 verts)
- 3 stuffed toys (442-1640 tris, 223-862 verts)
- 1 fridge (3 textures) (1554 tris, 832 verts)
- 1 television remote control (541 tris, 325 verts)
- 1 television (2 textures) (300 tris, 161 verts)
- 2 folders (4 textures) (open and closed version) (450 tris, 240 verts)
- 6 pens, including a pencil, a propelling pencil and a marker pen (3 textures) (48-278 tris, 26-141 verts)
- 1 mug (3 textures)(240 tris, 120 verts)
- 2 mug coasters (square and round) (3 textures) (20-80 tris, 12-42 verts)
- 1 all in one computer (includes a keyboard, a mouse, a mouse mat and a screen) (3 textures) (1432 tris, 784 verts)
- 1 mat carpet (8 textures) (52 tris, 28 verts)

- As a bonus, the pack includes demo room model pieces. Totally 25 pieces of walls, floors and doors. Room walls and floors have 5 textures. Doors and windows have 3 texture variants.
- Pack contains 2 showcase demo scenes. “AllProps” demo scene presents all the furniture and devices aligned on a grid. “DemoRooms” shows examples on how you could use this package’s contents in your projects.

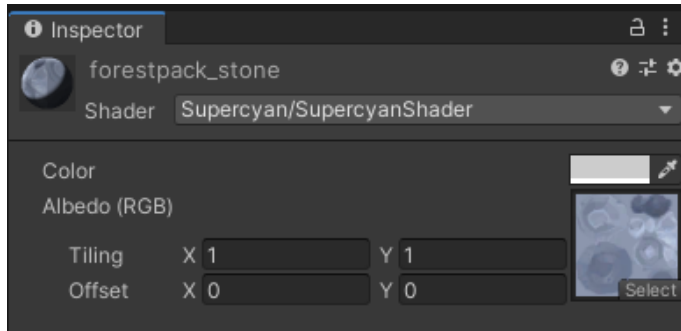

Technical details

- All props and prop variations have game ready prefabs.
- Mobile friendly prefab versions can be found with *Mobile_* prefix and materials with *_low* suffix.
- No model has more than 3160 triangles or 1660 vertices. The average model ranges around 400 triangles and 200 vertices.
- All prefabs that are not thin, like posters, have custom modeled mesh colliders for the best performance and collision accuracy.

- Texture size is 1024 in all props. No transparent textures or backface-culling used in models. This makes assets low poly and mobile friendly. Each texture has a Photoshop .PSD file included for further editing purposes.
- A custom made shader “SupercyanShader” can be found in the folder **Shaders/SharedShaders**.
- Older Supercyan “CelShader” can be found in the folder **Shaders/SharedShaders/Legacy**.
- Models FBX versions are between 2011 and 2018. Older versions can be provided on request.

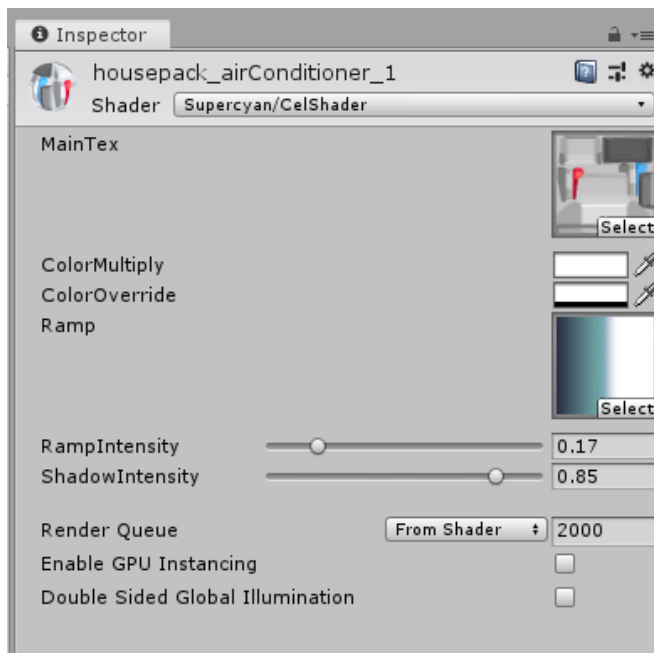

Supercyan Shader properties

Color = Color the albedo texture is multiplied with (supports instancing).

Albedo = Albedo texture

Legacy CelShader shader properties

MainTex = Main texture

ColorMultiply = Color that gets multiplied with the main texture

ColorOverride = Color that is put on top of the main texture, alpha is the intensity

Ramp = Color lookup table that is applied based on the shadows

RampIntensity = Transparency of the applied ramp

ShadowIntensity = Shadow transparency
